

The banner features a dark background with a bright orange starburst on the left. On the right, a man in a white sweater is smiling and holding a young girl in a colorful striped shirt and patterned boots. The text "St. Luke's Center for Neuroscience" is centered in white.

# St. Luke's Center for Neuroscience

## St. Luke's Acute Rehabilitation Center (ARC)

### Inpatient Acute Rehabilitation Program

St. Luke's Acute Rehabilitation Center (ARC) is part of the comprehensive Center for Neuroscience at St. Luke's Hospital & Health Network and as such, has the capability to provide patients a full spectrum and continuity of care. St. Luke's ARC is the only area facility featuring a neurologist as medical director.

Rehabilitation strives to assist individuals who have experienced a catastrophic illness or injury to re-learn or develop the skills to live as independently as possible after leaving the hospital. Acute inpatient rehabilitation consists of at least three hours of therapy per day, five days a week.

St. Luke's ARC provides services on an inpatient basis for people with the following conditions:

- Brain Injury
- Multiple Traumatic Injuries
- Stroke
- Spinal Cord Injury
- Joint Replacements
- Neurological Disorders
- Orthopedic Injuries
- Arthritis
- Amputation
- Burns

### Our Approach to Care

An individualized treatment program is developed for each patient based on an evaluation at the time of admission. The treatment team may consist of a physiatrist, physical therapists, occupational therapists, speech / language pathologists, rehabilitation nurses, a social worker, psychologists and a recreational therapist.

### Accreditations

Joint Commission on Accreditation of Healthcare Organizations (JCAHO)

### To Make a Referral

If you believe that your patient could benefit from St. Luke's Acute Rehabilitation Center, call 610-954-1975.
