ST. LUKE'S PEDIATRIC HOSPITALIST SERVICE

The pediatric hospitalist service is a dedicated program featuring physicians who specialize in the care of hospitalized children. The pediatric hospitalist serves to rapidly coordinate inpatient care and react in real time throughout the day to clinical data and changes in the medical status, from the most common childhood illnesses to more complex health care needs.

In order to ensure the most appropriate follow-up and post-hospital care, pediatric hospitalists communicate with the primary care providers and subspecialists involved in each child's care. These physicians are also available for consultation for those pediatric patients requiring surgery or observation for injuries related to trauma.
