### ST. LUKE'S PEDIATRIC DEPARTMENT

The Pediatrics Department at St. Luke's Hospital-Bethlehem Campus provides continuity of care in both the inpatient and outpatient settings for infants, toddlers, school-aged children and adolescents.

Treating almost 3,000 children each year, the unit's staff is dedicated to working closely with their patients' families in coordinating care, from admission to discharge from the hospital. The pediatric professional nursing staff is specially trained to be sensitive to the special needs of children with serious illness or injury.

The department is designed to promote and maintain a healthy and safe environment for children and their families. The halls are filled with jungle animals of all shapes and sizes. The exotic colors and theme carry through from the giant wildlife wall murals to the flooring complete with animal inlays.

**The Inpatient Pediatric Unit is decorated with an exotic jungle theme and features giant wildlife wall murals. The rubber flooring absorbs noise better, making the unit quieter for patients.**

St. Luke's Pediatric Unit features:

- State-of-the-art security system
- Internet access
- Playroom close by the nurses' station (available to children who are not in isolation)
- Parent lounge with refrigerator, TV and microwave
- Overnight privileges. One parent is invited to stay overnight with younger children
- VCRs and DVD players in every room; pediatric library and video games available
