

Experienced health care for

My Child.

When you have a child, she becomes the most important person in your life. In our family, that person is our daughter. Her life started before she was ready... before we were ready. Born three months early, she was so small and fragile. Thank goodness, a team of experienced doctors and compassionate, knowledgeable nurses was ready for her arrival at St. Luke's Neonatal Intensive Care Unit.

Over the years, our family has relied on the St. Luke's family, from the sensitive, caring staff in St. Luke's Inpatient Pediatric Department to the highly experienced pediatric specialists at St. Christopher's Pediatric Specialty Care at St. Luke's North.

Today our daughter is lucky seven, and we can't help feeling very lucky ourselves.
