### ST. LUKE'S PERINATAL CENTERS

St. Luke's Perinatal Centers offer a wide range of services in the diagnosis and treatment of complicated and high-risk pregnancies, and this highly specialized care is available close to home.

With ever-expanding scientific knowledge and new capabilities to diagnose and treat maternal and fetal problems, St. Luke's Perinatal Centers are able to make a real difference in the outcome of pregnancies that develop serious problems.

#### **St. Luke's Perinatal Associates**

Perinatal care is provided through St. Luke's Perinatal Associates. St. Luke's experienced perinatologists collaborate with obstetricians to ensure their high-risk patients have a good experience and ultimately deliver a healthy baby. The doctors of St. Luke's Perinatal Associates are board certified in Maternal-Fetal Medicine and board certified in Obstetrics and Gynecology.

#### **St. Luke's Perinatal Associates provides high-risk obstetrical care:**

- Management of multiple births
- Management of pre-pregnancy diabetes and gestational diabetes
- Care for mothers of advanced maternal age
- Management of medical complications and pregnancy
- Pre-conception and genetics consultation
- Fetal diagnostic and therapeutic procedures
- Critical care obstetrics

#### **Advanced Ultrasound Technology from GE Healthcare**

St. Luke's Perinatal Centers are equipped with advanced ultrasound technology that allows doctors to evaluate the unborn fetus even earlier in pregnancy. Utilizing these new technologies as well as new insights into the biology of early embryonic development, St. Luke's Perinatal Centers can offer excellent screening tests to women as early as eleven weeks gestation and reassure them as to the health of their developing baby.
