

## St. Luke's Wound Management Center – Bethlehem Physician Testimonial

### Carol Myers, DO, Medical Associates of Bethlehem

Carol Myers, DO, Medical Associates of Bethlehem, has been practicing internal medicine in the area for six years.

Dr. Myers has seen an increase in the number of wound cases coming to her office in recent months. From non-healing wounds in the elderly to diabetes, peripheral vascular disease, injuries and wounds at colostomy sites, Dr. Myers refers all of her patients to the St. Luke's Wound Management Center – Bethlehem.

"I'm most impressed by the amazing results I've seen from every patient I refer to St. Luke's. This combined with the extraordinary promptness of their appointment scheduling keeps me sending my patients back to St. Luke's Wound Management Center in Bethlehem," Myers comments.

Most patients are scheduled within one week of making an appointment and many within a day or two.

"I feel at ease sending my patients to St. Luke's for their wounds because I know the level of expertise is tremendous. They are so thorough; they assess every nuance of my patients' situations and then facilitate the appropriate treatments and coordinated services," Myers adds.

Dr. Myers goes on to share a story of a young woman who recently came to her with a traumatic foot injury. "The skin was partially removed from the top of her foot. It couldn't be sutured; it had to be debrided. She was extremely concerned about scarring and the appearance post treatment. She and I were both thrilled with the results. There was almost no scar at all. She was extremely thankful to us for referring her to St. Luke's Wound Management Center – Bethlehem," Myers concludes.
